UP BSN *Pre-Licensure* Student Handbook

UNIVERSITY OF PROVIDENCE

The Bachelor of Science in Nursing (BSN) Pre-Licensure (PL) Program aligns curricular and learning activities with the [Mission of University of Providence](#) (UP).

The University continually and responsibly evaluates its operation and programs; the BSN PL program participates in this evaluation process. The University offers students a foundation for actively implementing UP values and the teachings within the Catholic tradition; it serves students of all beliefs who wish to take advantage of its programs. The faculty and staff of the UP join with students in a cooperative and enthusiastic search for truth, so that students may develop:

- Character - have a positive impact on the world and to the communities in which they live and work, particularly by recognizing and accepting personal accountability to themselves, to society, and to God;
- Competence - further their ability to live full and rewarding lives by becoming competent working members of society who know the basics of their professional field and have access to future learning;
- Commitment - find meaning in life which enables them to participate effectively in society while transcending its limitations, by living according to their moral and religious convictions, as well as respecting the dignity and beliefs of other people.

The University's Bachelor of Science Degree in Nursing (BSN) program was developed in response to an initiative of and in partnership with Providence St. Joseph's Health Care (PSJH). Academic policies and procedures of the University of Providence are in effect as program policies and procedures unless otherwise stated.

This Undergraduate BSN Student Handbook is an official communication, and as such, an extension of the policies and procedures of the University of Providence.

ACCREDITATION AND AFFILIATION

[Northwest Commission on Colleges and Universities Accreditation](#): UP is a private, Catholic university, incorporated under the laws of the State of Montana. The University has been empowered to grant diplomas and confer academic honors and collegiate degrees since 1932. The University is sponsored by the Sisters of Providence and operates within the jurisdiction of the Catholic bishop of Great Falls- Billings. UP is accredited by the Northwest Commission on Colleges and Universities, an institutional accrediting body recognized by the Council for Higher Education Accreditation and the United States Department of Education.

[Commission on Collegiate Nursing Education](#): The BSN program at UP is accredited by the Commission on Collegiate Nursing Education (<http://directory.ccnecommunity.org/reports/newapps.asp>).

[Montana Board of Nursing](#): UP has full approval to offer a bachelor of science in nursing (BSN).

BACHELOR of SCIENCE in NURSING (BSN) PROGRAM DESCRIPTION

The **BSN program** is offered to individuals without licensure as a Registered Nurse, who are seeking preparation in professional nursing at the baccalaureate level with completion of the degree leading to eligibility for licensure as a registered nurse in any state in the US.

Currently, the BSN program is offered with clinical experiences provided in Anchorage, Alaska, or Lewistown, Montana. The program is delivered through a combination of distance technologies, face to face clinical settings, and

UP BSN *Pre-Licensure* Student Handbook

simulation labs. Students in the BSN pre-licensure program may enter the program with a previous bachelor's degree in another field; or with college credits toward a bachelor's degree; or as incoming freshman without a degree.

Once students are accepted into the BSN major, they are expected to progress through the nursing curriculum on a full-time, cohort-based model to complete the 54-credit major in 3 consecutive semesters or 12 months' full-time work. The [UP undergraduate catalog](#) provides a description of the required nursing courses. Further description of the courses is in [APPENDIX A](#). Students will be admitted into the nursing major each spring (January) with a mandatory face-to-face orientation at the beginning of the program.

NURSING PROGRAM PURPOSE

The BSN Option is an intensive nursing program for students who already have bachelors or who have completed at least 66 college credits, including the required nursing pre-requisites and UP Core courses. The BSN degree prepares graduates for an entry-level position as a registered nurse in a variety of settings.

The UP PL BSN program provides intensive immersion in nursing science to prepare graduates for entrance into practice as a registered nurse.

The program has excellent clinical affiliations, an innovative curriculum, and reputable faculty.

In the tradition of the visionary Sisters of Providence; the University of Providence and Providence St. Joseph Health (PSJH) created a partnership to develop and implement the BSN Pre-licensure program. This collaborative team process united expert University and Providence faculty, state-of-the-art academic university resources, nurse educators, and a professional consultant who specializes in baccalaureate curriculum development to support students in attainment of a BSN.

This partnership between an academic institution and a healthcare system significantly impacts the education the student will receive and prepares each student for innovative nursing practice which is grounded in the mission of PSJH: *As expressions of God's healing love, witnessed through the ministry of Jesus, we are steadfast in serving all, especially those who are poor and vulnerable.* The students are also grounded in the PSJH values of: *Compassion, Dignity, Justice, Excellence, Integrity* and with the vision of *health for better world.*

BSN PROGRAM THEMES

Compassion Ethics and Spirituality	Population and Community Health	Inter-Professional Collaboration
Patient and Family Centered Care	Transforming healthcare	Reflective Practice and Lifelong Development
Leadership and Effective Advocacy	Safety and Quality Outcomes	Evidence Based Practice
	Professional Accountability	

BSN PROGRAM OUTCOMES

A graduate of the BSN program will be a leader in healthcare. Graduates will be excellent communicators, clinicians and leaders of change. A graduate is a life-long learner and will enhance the nursing profession by providing evidence-based nursing practice that is population centered, as well as grounded in spiritual, ethical and compassionate care. UP's nursing curriculum is built to respond to the rapidly changing health care system, as well as to student's needs.

UP BSN *Pre-Licensure* Student Handbook

The graduate of the Bachelor of Science in Nursing Program of UP is prepared to:

1. Integrate a compassionate and ethical understanding of the human experience into nursing practice using the foundations of a liberal arts education.
2. Apply leadership concepts, skills, and decision-making to engage healthcare teams in creating, promoting, and managing safety and quality outcomes.
3. Apply nursing practices that are informed by research, evidence-based practice and innovation to optimize health.
4. Utilize information technology to communicate, mitigate errors, and make improved clinical decisions related to the care of diverse populations.
5. Advocate to influence change in legal, political, social, and economic factors that transform healthcare delivery.
6. Collaborate with the inter-professional team to improve patient/family outcomes and the work environment.
7. Provide compassionate, spiritual, ethical, and culturally appropriate care across the lifespan and the continuum of care.
8. Practice preventive care, health promotion, and disease intervention across care settings for self, individuals, families, the community, and populations.
9. Assume professional accountability to uphold the standards of nursing practice as defined by the Nurse Practice Act (in the state in which the nurse practices) and the ANA Code of Ethics.
10. Demonstrate reflective nursing practice.

University of Providence Bachelor's Degree Core Requirements

Students and applicants are encouraged to work with a BSN nursing advisor to determine outstanding Core Requirements.

The UP Core requirement is waived for applicants who already have a baccalaureate degree.

Core requirements for the baccalaureate can be reviewed here: <https://www.uprovidence.edu/explore-programs/undergraduate/bachelor-degree-requirements/>.

BSN PRE-LICENSURE NURSING COURSES

Pre-Requisite Courses

The BSN Pre-licensure nursing major courses will be offered to pre-nursing students at the University of Providence. Student must complete requirements within the Core Curriculum* in addition to the following program pre-requisites to the nursing major:

These courses must be completed before starting the NRS-PLZ courses.

- Anatomy and Physiology with Labs (total of 8 semester credits)
- Microbiology (3 semester credits)
- Statistics (3 credits)
- Nutrition (3 credits)

*Students who have previously obtained a bachelor's degree in any field other than nursing are waived from the requirement to complete the University Core curriculum. Post Baccalaureate applicants must still complete the prerequisites prior to beginning the nursing program.

BSN Courses

After acceptance into the BSN program, the student will progress in a full time cohort. Each class must be completed successfully in order to progress in the curriculum.

UP BSN *Pre-Licensure* Student Handbook

Table 1. BSN courses with links to program outcomes

Course	CourseTitle	Link to Program Outcomes	Didactic Credits	Clinical* Credits
SEMESTER #1 1st 8 weeks				
NRS-PL 313	Nursing Practice Fundamentals	1, 3, 5, 9, 10	2	2
NRS-PL 410	Evidence Based Nursing Practice	1, 3, 5, 6, 7, 8, 10	3	
NRS-PL 370	Introduction to Professional Nursing	4, 6, 9	2	
SEMESTER #1 2ND 8 weeks				
NRS-PL 372	Nursing Concepts I	3, 4, 10	1	2
NRS-PL 412	Nursing Ethics and Spirituality	1, 7, 10	3	
NRS-PL 376	Pathophysiology and Pharmacology I	1, 2, 4, 6, 7, 8, 10	3	
SEMESTER #2 1st 8 weeks				
NRS-PL 430	Advanced Nursing Skills	1		2
NRS-PL 422	Quality & Safety in Nursing Leadership	2, 3, 6	3	
NRS-PL 378	Pathophysiology and Pharmacology II	1, 2, 6, 7, 8, 10	3	
SEMESTER #2 2nd 8 weeks				
NRS-PL 374	Nursing Concepts II	1, 3, 5, 6, 8, 9, 10	3	
NRS-PL 421	Nursing Leadership	1, 3, 5, 6, 7, 8, 10	3	1
NRS-PL 414	Population Health	1, 3, 4, 5, 7, 8	3	
SEMESTER #3 1ST 8 WEEKS				
NRS-PL 474	Advanced Nursing Concepts	1, 2, 3, 4, 5, 6, 7, 8, 9	2	
NRS-PL 350	Clinical Nursing Practice	1,3		4
NRS-PL 425	Health Promotion in Nursing	5, 6, 7, 8	3	
SEMESTER #3 2ND 8 WEEKS				
NRS-PL 417	Global Perspectives in Healthcare	3, 5, 7, 8	2	
NRS-PL 450	Advanced Clinical Nursing Practice	1, 2, 3, 4, 6, 7, 8, 9, 10		6
NRS-PL 495	Senior Seminar	1, 2, 3, 4, 5, 6, 7, 8, 9, 10		1

**Clinical Credit 1 clinical credit = 6 hours of clinical learning time per week for each of the 8 weeks the course meets*

UP BSN *Pre-Licensure* Student Handbook

PROGRAM COSTS

Tuition and fees information are updated regularly and are available on the [School of Health Profession's website](#). In addition, students in the BSN will need to purchase/obtain other educational requisites including:

Computers and Educational Computer Software

Course Texts

Health Insurance

Health Safety and Immunization Requirements

Uniforms and Footwear

Clinical Supplies as Defined by Each Course

Transportation to Clinical Sites

Students should therefore begin planning early for financial aid to meet their educational goals.

Tuition each semester is due no later than the first day of classes for that semester. Students must pay the balance on their accounts or have made arrangements to pay their tuition by the first day of classes. For additional information, contact the [Student Accounts and Financial Aid Office](#): (406) 791-5202.

Financial Aid

Students interested in applying for federal student aid will need to complete the Free Application for Federal Student Aid form (FAFSA), available at <https://www.fafsa.ed.gov>. The required school code for the University of Providence is 002527. A student is eligible for financial aid when enrolled in six or more credits. For additional information about UP financial aid, contact the [Financial Aid office](#) at (406) 791-5202.

Grants

Eligible students can apply for grants either independently or through the [University's Financial Aid Office](#) (406) 791-5202. Examples of grants include:

- [Federal Pell Grant](#) is a grant for undergraduate students. Pell Grants generally will be paid for fall and spring semesters only. For students enrolled less than half time, awards are made contingent on Federal funding.
- [Federal Supplemental Educational Opportunity Grant \(SEOG\)](#) is a grant for exceptionally needy undergraduate students. Funding is limited and Pell eligible students will receive first consideration to the extent that funding is available.
- [Montana Higher Education Grant \(MTEDUC\)](#) award is made through joint funding from the State of Montana and the Federal government. Awards are based on need and made only to Montana residents.

Payment Plans

To review options for a payment plan, students should the [Student Accounts and Financial Aid Office](#) (406) 791-5202 for more information on the University's partnership with Professional Accounts Receivable Management (PARM).

Refunds

The refund schedule for tuition is listed in the academic calendar for each semester. University fees are non-refundable. Please refer to the University's undergraduate catalog for additional information.

ADMISSION and ENROLLMENT

The Baccalaureate in Nursing curriculum is designed to prepare students for work within the complex and changing health-care environment. Students in a Bachelor of Science in Nursing curriculum are therefore

UP BSN *Pre-Licensure* Student Handbook

expected to develop critical-thinking and communication skills, in addition to receiving clinical education in clinics, community settings, and hospitals. The foundation of the BSN is a liberal arts education and includes classes in the humanities, social sciences, basic sciences, ethics, and nutrition.

Application to University of Providence

Admission to the Baccalaureate in Nursing Program of Study **requires [application and admission to the University of Providence first](#)**, as well as completion of nursing pre-requisite course work. Admission to the University does not equate to acceptance to the nursing program.

As a first step, persons interested in a baccalaureate degree in Nursing should [contact the School of Health Professions](#) and begin working with an academic advisor.

To facilitate transcript evaluation and advisement, a student must [Apply to the University of Providence](#) and indicate their major as **pre-nursing**. Students are considered **pre-nursing** until they have:

- 1) completed the required pre-requisites, including Core
 - 2) applied to the Nursing Program;
 - 3) and have received placement in the upper division BSN “NRS” portion of the program of study
- Students who have not been formally accepted to the BSN program, may not take NRS designation courses.
 - Students may transfer in credits from other higher educational institutions that would apply to the pre-requisite and some of the UP required Core Curriculum courses. *Transfer equivalency is determined by the [UP Registrar’s Office](#).*
 - Students should work closely with a pre-nursing advisor to ensure courses will transfer in as equivalent before attempting the course. Students will receive a Core evaluation audit sheet for the nursing program. This document will be used by the student to develop a degree completion plan.

Academic Advisors

The Program Coordinator for Nursing and Health programs is assigned as the initial advisor for each student. Students will then be assigned a Faculty Advisor. This advisor works with the student until graduation. Communication between the advisor and student can occur face-to-face, via the telephone, and/or email. Students are highly encouraged to confer with the nursing advisor if any academic problem, conflict, or concerns arise. The nursing advisor also consults with the Division Chair for Undergraduate Nursing to work individually with students needing consultation.

APPLICATION TO THE BSN MAJOR

Applicants working with a UP School of Health Professions advisor will be assisted in determining readiness to apply to the upper division portion of the BSN program of study.

The BSN application will be **available August 15th** on the BSN page at: <https://www.uprovidence.edu/explore-programs/providence-bsn-tracks/> The application is **due by September 15th**.

The BSN placement decision is based upon available resources (clinical sites and faculty) and candidate qualifications, including:

- Cumulative GPA of at least 3.0
- All nursing pre-requisite course work completed with a “C” (GPA 2.0) or better with no more than a total of 2 repeats in pre-requisite courses (see page 3)

UP BSN *Pre-Licensure* Student Handbook

- Completion of pre-requisite courses by December 15th
- A minimum of 66 college credits (including UP Core Curriculum) completed by December 15th
- Completion of urine drug screen and back ground through CastleBranch® by September 15th
- Please note, accepted applicants will need to complete additional Nursing Program Health, Safety, and Communicable Disease Requirements by December 15th
- Accepted applicants will receive further information in their program acceptance letter

Other admission criteria which may be considered include:

- Relevant healthcare experience
- Providence St. Joseph Health employee/dependent status
- Clinical site community member (Lewistown, MT; Anchorage, AK)
- Diversity, including cross cultural experiences which contribute to a diverse workforce
- Previous baccalaureate degree
- Interview of qualified applicants

All application decisions are provisional and pending final confirmation of completion of the required nursing pre-requisite courses in process at the time of application; GPA requirements; and resolution of any outstanding clinical, health, safety and immunization requirements

Applicants who are admitted to the BSN program are required to complete this 3-semester (spring, summer, fall) sequence of 54 credits.

Nursing courses are offered sequentially; therefore, students must pass each course in sequence or withdraw if failing a course. The student may petition for readmission to another cohort. If in good standing, and if space is available, the student may be readmitted, but this is not guaranteed.

Timelines

- **August 15th -September 15th:** Applications will be accepted. Official transcripts must be submitted for any courses completed at the time of University Application.
- Email the completed nursing program application to nursing@uprovidence.edu by deadline of Sept 15th
- **September 15th:** Background check and urine drug screen must be completed through CastleBranch®
- **September 15th - October 15th:** Review of applicants (which may include an interview)
- **October 22nd:** Notification of qualified applicants of placement offer
- **October 28th:** Candidates offered placement must confirm placement verify progress in CastleBranch® clinical compliance tracking
- **December 15th:** clinical compliance tracking must be complete (see your CastleBranch® account)
- **January 5th:** Deadline for receipt of official transcripts for any courses work in progress during fall semester
- Please Note: One-week prior to semester start, there is a required face to face program immersion. Applicants will receive further information in the placement offer letter
- **APPLICATION Deadline: September 15th**

UP BSN *Pre-Licensure* Student Handbook

Nursing Program Application Requirements:

- Completion of 66 college level credits, including required nursing pre-requisites and Core Curriculum by December 15th in order to start the BSN Nursing Courses in January

-

Anatomy and Physiology with Labs (total of 8 credits [typically as API & APII])	Microbiology with Lab (4 credits)
Statistics (3 credits)	Nutrition (3 credits)

- Submission of transcripts—to the nursing program advisors-- **for every college or university attended** (exception: University of Providence course work)
 - Initially, these may be unofficial transcripts
 - Once the student is ready to formally apply for placement, official transcripts are required; failure to submit official transcripts from every college or university attended may result in the application not being processed for review
 - Pre-requisite course work taken at any College or University other than at University of Providence requires approval from the [UP Registrar](#) for transfer equivalency
 - The Nursing Program Coordinator or individual Nursing Advisor will assist students in the transfer equivalency approval processes
- All of the required nursing prerequisite courses must be completed with a grade of C or better (“C- “Grades are not acceptable) and no more than 2 of the required prerequisites courses listed above may be repeated 1 time to earn a grade of C or better (i.e. max of 2 retakes in the pre-requisites, regardless of grade earned)
- The calculated cumulative GPA of the **nursing pre-requisite courses** listed above **must be ≥ 2.0 at the time of application**
 - GPAs for all applicants will be calculated using those grades earned up to the application
 - **GPA will not be recalculated when Fall grades are available**
 - Fall grades will be audited to determine if all required prerequisite courses have been completed with a grade of C or better.
- Completion of all nursing pre-requisite courses by December 15th, following the application deadline
- Completion of required Nursing Program Health, Safety, and Communicable Disease Requirements (Clinical Compliance Tracking) through CastleBranch[®] see below)

Nursing Program Health, Safety, and Communicable Disease Requirements

It is a privilege for University of Providence nursing students to work with our many community health care facilities across the western region of the U.S. To ensure the safety and wellbeing of all patients, background checks, urine drug screening, and immunizations to prevent communicable diseases, have become standard requirements for employment in health care. The School of Health Professions utilizes CastleBranch[®], an accredited member of the National Association of Professional Background Screeners (NAPBS).

A link to CastleBranch[®], for the following requirements can be found in the BSN program application.

Applicants must complete a urine drug screen and background check by the application due date of September 15th.

Remaining clinical compliance items must be completed December 15th and includes:

- Immunizations ([see APPENDIX C](#))
- CPR American Heart Association BLS for HealthCare Providers
- Health Insurance
- HIPAA and OSHA training

UP BSN *Pre-Licensure* Student Handbook

All clinical compliance must remain current while the student is in the program. Students may be required to complete additional, state specific information, depending on their clinical placements.

The results of the urine drug screen and background check are tracked on CastleBranch® by the BSN Division Chair and his/her designee. The Division Chair, or the assigned designee may contact a student directly if further information and/or clarification about background check findings are warranted.

Due to the confidential nature of the background check findings, the results of the background check and urine drug screens are not placed in the student's permanent file.

Any student who faces criminal charges while enrolled in the BSN program is required to the Division Chair for Nursing within ten (10) working days of such charges. that may affect his/her ability to function in the academic or lab setting.

Criminal charges include but are not limited to misdemeanors, felonies and convictions, such as shoplifting, drug charges, driving under the influence (DUI), Minor in Possession (MIP), reckless driving and suspended license. These activities do not include legal matters regarding divorce, custody issues or parking tickets.

Urine drug screen results and criminal background check issues will be addressed by the Division Chair.

Technical Standards for Admission, Academic Progression, and Graduation

The goal of the UP BSN program is to prepare every student to think critically, and practice nursing competently and compassionately in rapidly changing practice environments. The curriculum is designed to build nursing knowledge, enhance nursing practice and patient safety, foster professional integrity, and ultimately improve the health outcomes of patients, families, and communities across the continuum of care.

Certain functional abilities are essential for the delivery of safe, effective nursing care during clinical training activities. Therefore, the faculty has determined that certain **technical standards** are requisite for admission, progression, and graduation from the nursing programs. These standards, and the attestation form, can be found in [APPENDIX B](#).

In addition to classroom learning, clinical learning occurs throughout the program and involves considerations (such as patient safety and clinical facilities) that are not present for classroom accommodations. For this reason, any applicant or student who seeks accommodations prior to or immediately after enrolling in the nursing programs must also request an assessment of the types of reasonable accommodations needed for the clinical training component of the program.

If you have questions or concerns about your ability to meet the technical standards with or without accommodations, or if you would like to arrange reasonable accommodations please contact UP [Disability Services](#).

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others.

UP BSN *Pre-Licensure* Student Handbook

Professional Standards and RN Licensing

All nursing students must adhere to the conduct expectations outlined in the [Montana Nurse Practice Act Rule 24.159.2301](#), the American Nurses Association Code of Ethics for Nurses, and the behaviors outlined in this BSN Student Handbook. It is the intent of these policies to ensure client safety and professional conduct by appropriate ethical-legal behavior on the part of all nursing students. All nursing students are expected to be responsible for their actions. A student's failure to abide by the outlined expectations at all times shall initiate faculty evaluation of a student's ability to continue in the clinical rotation and therefore, the Nursing Program.

The Montana State Board of Nursing regulates licensing and can deny RN licensure for a number of reasons; for example, conviction of a misdemeanor or a felony. Prior to beginning the Nursing Program, students are advised to visit the [Montana Board of Nursing website](#): or call the Montana Board of Nursing for questions regarding eligibility for licensing :

- Phone: (406) 444-5711
- Email: UnitB@mt.gov

Criteria for licensing as a Registered Nurse varies by state, as each state nursing regulatory body (Board of Nursing) establishes their individual requirements. Requirements may include submission of fingerprints, a criminal background check, health assessment, or specific educational content. Students are advised to check requirements for states in which they intend to seek licensure.

Registration for Courses

Once students are accepted to the BSN program, they may register for their BSN courses each semester. Once registered for classes, tuition and fees are assessed and students will receive an invoice. Students are responsible for paying each semester's tuition and fees or making an approved payment arrangement by the due date. Students are also responsible for completing all required documents and actions to accept financial aid to apply toward each semester's charges. All outstanding amounts resulting from nonpayment of tuition and fees are the responsibility of the student. Withdrawal from school, officially or unofficially will not cancel any financial obligation already incurred. Additionally, failure to pay all financial obligations may result in debts being turned over to a collection agency. Collection costs, including attorney fees and other charges necessary for collection of any amount due, will be added to the student's account balance.

Students may request an incomplete in a course and will be bound by the University's policies about completing the course. Students who have an incomplete in a course and wish to register for a course that requires the incomplete course as a pre-requisite, must finish and receive a final grade for the course before they will be allowed to register for sequential nursing courses.

Student Participation in Governance

Once accepted to the BSN program, students have the opportunity to participate in governance through the Student Affairs Committee. A faculty representative from each BSN track is available as a liaison between the students and faculty; student representatives from each track represent their programs. Meetings occur in February and November and on an as needed basis. The faculty representatives will arrange for a CollaborateUltra[®] or Skype[®] meeting for the students on an agreed upon time/date in those months. A standing agenda for each meeting includes these topics:

- Clinical
- Classroom
- Course delivery
- Policy
- Pinning Ceremony

UP BSN *Pre-Licensure* Student Handbook

- Curricular Outcomes
- Orientation
- Recruitment and Retention
- Other topics as determined by student or faculty representatives

ACADEMIC POLICIES

Academic Policies of the University of Providence can be found on the University of Providence website at this link: <https://www.uprovidence.edu/academics/academic-policies/>

BSN Grading Requirements and Grading Scale

Final grades for each course can be obtained by the students one week after the last day of the semester. Grading timeline for each course will follow the University's grading schedule. Please contact the registrar's office for additional information. In order to pass a course with a clinical component, students must have a passing grade in both the clinical and the didactic portion of the course. Students who fail either element will not pass the course.

The grading scale to be followed by the faculty for each BSN course is:

- A = 90-100%
- B = 80-89%
- C = 70-79%
- D = 60-69%
- F = 59%-below

Minimum Grade for Progression in Nursing Courses

- 1) A minimum grade of "C" is required in all required **pre-requisite** and **co-requisite** courses.
- 2) A minimum grade of "C" is required in all **nursing** theory, laboratory and clinical courses.
- 3) The student must have, as a final grade in the clinical portion of any didactic/clinical course combination, of "PASS" in order to pass the course—regardless of the didactic grade for the course.
- 4) Stand-alone clinical courses will be graded using letter grades.

Integrated Testing with ATI®

The BSN program utilizes the Assessment Technologies Institute (ATI®) integrated testing, during the program of study. These assessments prepare students for the nursing licensure exam (NCLEX) and also help them gain critical thinking skills and a comprehensive nursing knowledge base.

Students in the PL BSN are **required to complete all assigned ATI activities**, including practice tests, proctored tests, lab preparation, case studies, and simulations—at the benchmark set by the course faculty—in order to complete the course in which the activity resides.

See [Appendix E](#) for the ATI benchmarking policy.

Refer to individual course syllabi for ATI® requirements.

UP BSN *Pre-Licensure* Student Handbook

ProctorU ® Monitored Testing

UP utilizes a testing service, ProctorU®, for certain high-stakes tests. **Students are required to set up an account for ProctorU® at <https://www.proctoru.com/resources/test-takers/live/>** Technical requirements for the use of ProctorU® can be found at this site as well.

Faculty will inform students of tests requiring monitoring by ProctorU®. Proctored tests may include course final tests, formative tests, and ATI tests. The cost of proctored testing is paid by UP.

ProctorU® is a live online proctoring service that allows students to take exams from remote location. ProctorU® is available 24/7, however, students must schedule individual proctoring sessions at least 72 hours in advance to avoid any on-demand scheduling fees.

In order to use ProctorU®, students will need:

- a high-speed internet connection,
- a webcam (internal or external),
- a windows or apple Operating System,
- and a government issued photo id.

ProctorU® recommends students visit <https://test-it-out.proctoru.com/> **prior to the proctoring session to test their equipment.** They recommend use of the feature which allows connection to a live person to fully test equipment. Students should assure they are using the current version their web browser and have downloaded the ProctorU extension available at <http://bit.ly/proctoruchrome> or <https://www.proctoru.com/firefox>.

Additionally, [students should visit and review the test-taker resource center here.](#) Students should expect the startup process with the proctor to take about 10-15 minutes. However, this time will not affect individual exam time. Please feel free to direct any questions to the student support team via the live chat within the individual account.

Professional Standards and Conduct

Nursing students may be removed from the program for clinical conduct reasons, including: patient safety concerns, and violation of confidentiality (HIPAA); failure to comply with program requirements related to health and immunization status, background checks and infractions of the law, and substance abuse. Removal from the clinical portion of the course may result in failure of the course and would therefore require removal (withdrawal) from the program of study.

Nursing students are expected to refrain from the use of all illegal substances. If a student is suspected of illegal substance use on UP campus, university policy will be followed.

Concerns about a student being under the influence of alcohol or any other substance which could endanger patient safety will result in student removal from the clinical area and immediate drug and alcohol testing. When requested by officials at the clinical site or a faculty member, students must provide a drug/alcohol screen according to the specific standards that the clinical agency or university defines. A student referred for a drug/alcohol screen will be temporarily suspended from clinical work until the results of the screen are reported. Nursing faculty and/or a program administrator will direct the student where and when to have screening completed to ensure compliance. Students must comply with testing to remain in the nursing program. The student/applicant is responsible for costs associated with the screening. Students who are removed for clinical conduct issues may appeal to the Division Chair for Undergraduate Nursing Programs.

UP BSN *Pre-Licensure* Student Handbook

Unsatisfactory Student Performance

Students should exhibit high standards of academic conduct. All acts of dishonesty in academic work constitute academic misconduct. Such acts include:

Cheating: use or attempted use of unauthorized material or the work of another student in any academic assignment, paper, or examination.

Plagiarism: representation of another's work as one's own. This includes the unauthorized and unacknowledged use of the phrases, sentences, paragraphs, ideas, illustrations, drawings, photographs, or computer programs of another whether by using exact or nearly exact words without quotation marks or by omitting citations or both.

The course instructor is the initial judge of whether a student is guilty of academic misconduct. Should a student disagree with an instructor's judgment, the student may appeal the instructor's decision by following the "Academic Related Appeals Process."

The minimum penalty for an act of academic misconduct shall be a grade of "F" (failure) on the paper, assignment, or examination involved. More severe penalties may be enforced by individual instructors, provided that such penalties are identified in the course syllabus. The maximum penalty for plagiarism that may be levied is a grade of "F" (failure) for the course. Copies of plagiarized work will be placed on file with the Coordinator of Student Faculty Relations. Severe or repeated instances of academic misconduct will result in more severe sanctions up to and including expulsion.

University Academic Warning, Probation, and Suspension

[Academic Policies can be found in the UP Student Handbook.](#)

Undergraduate students will be evaluated at the end of each semester or upon attempting a minimum of nine (9) semester credits, to ensure they are making satisfactory academic progress toward their degrees.

In order to make satisfactory academic progress and remain in good academic standing, students must maintain a semester and cumulative GPA of at least 2.0 and must pass each clinical course in order to pass the entire course.

Students should work closely with their faculty in each course, as well as their faculty advisor to facilitate success.

University Academic Appeal Process

An Academic Suspension may be appealed for extenuating circumstances only. Consideration will be given to extenuating circumstances beyond the student's control (e.g., serious personal illness, injury, the death of an immediate family member, or other extreme duress). To appeal a suspension, the student is required to prepare a clearly written statement describing the circumstances leading to suspension and the student's plan for success in future semesters. Documentation to support the appeal, such as a letter from a physician, obituary notice, etc. must accompany the written statement. The appeal will be reviewed by the appeal committee. The student will be notified in writing of the committee's decision. The decision of the committee is final. The process for this appeal can be found in the [UP Student Handbook](#).

Nursing Program Appeals and Reinstatement to the Nursing Program

If an appeal is not upheld, students may not continue in the program and must submit a written request to be reinstated to the nursing program. Due to clinical capacity and faculty-to-student ratio requirements, resources in clinical programs are finite. It may therefore take more than one

UP BSN *Pre-Licensure* Student Handbook

academic semester to be reinstated. The request for reinstatement should be addressed to the Division Chair of Undergraduate Nursing Programs. A review of the student's records, scholarship eligibility, and any other pertinent information will be conducted. Students submitting a letter requesting reinstatement must show a clear plan for success in the program, fully addressing issues which caused the withdrawal/ failure.

If approval for re-instatement is made, the student will resume the program at the point of entry which allows for smooth progression to the next sequence as determined by the Division Chair of the Undergraduate Nursing Programs. Decisions are made in part with consideration for clinical capacity and student-to-faculty ratios. A statement of the student's problems/reasons for withdrawing or being suspended and the solution for correcting these problems will be signed both by the student and the Division Chair of Undergraduate Nursing Programs prior to the student resuming classes.

Withdrawal from the Nursing Program and Scholarship Funds

A student who withdraws (for any reason) from a nursing semester must follow university policy ([link](#)). Because the nursing program courses are sequential, and clinical capacity may be limited the student wishing to re-enter the program will be required to apply for placement in the next cohort. Although every effort will be made to accommodate students re-entering the program, placement in the next cohort may not be possible due to limited clinical capacity.

Withdrawing from a semester also has potential implications related to scholarship awards. Students who withdraw must also pay close attention to the university catalog for dates related to the tuition refund schedule. If a nursing student withdraws after the date in which tuition is nonrefundable, the student will be responsible for paying for the semester in which they return to the program.

Graduation

Information related to graduation, including graduating with honors, can be found on the [registrar graduation website](#). If students need further information, they may [contact the registrar by email](#) or at 406-791-5202.

Use of the University Logo for Professional Nursing Posters and/or other Publications

All nursing students must submit a request to the Division Chair for Undergraduate Nursing for approval prior to using the University logo on any materials.

Student Concerns Process

Students at the University of Providence who have a concern regarding the University's online courses or programs can submit a comment or follow the appeals process located in the [student handbook](#). Concerns must follow the University of Providence customary resolution procedure prior to being referred to the Montana University System and NC-SARA procedures. Grade appeals and student conduct appeals are not allowed under SARA guidelines. University of Providence Concerns – For more information on submitting a concern, please visit the [student concerns page](#) for further links to aid in this process.

STUDENT RESPONSIBILITIES

Contact Information

It is the student's responsibility to keep his/her email, phone and street address current and available in the School of Nursing. The student should notify the Administrative Assistant at their campus and should also update [ARGO](#) whenever there are changes in his/her status and name.

UP BSN *Pre-Licensure* Student Handbook

Computer Proficiency Requirements

It is the student's responsibility to have access to a computer and the internet. Students are required to routinely check electronic course materials to meet course requirements. During the program, students will be required to know and use Microsoft Word, Power Point and Excel programs. Students must have a personal laptop for the online nursing program.

Email

All students will be assigned a University email account with the expectation that students will check their email at least every 48 hours. Faculty will primarily communicate with students via email and Moodle, the e-learning environment used by the University for online courses.

Software

Students will be required to have access to a computer and internet for all online courses. Students will be required to use Microsoft Office software to complete assignments (this includes Word, PowerPoint, and Excel). Other software may be required for some courses.

Textbooks

Each course syllabus includes the list of required and recommended textbooks for each course. Students may order textbooks from the UP online bookstore, or a student may choose to purchase the textbooks locally or online through a different vendor.

Cell Phones

Cell phones must be 'silenced' during online class time or during clinical practice experiences to promote a positive learning environment for all students and patient privacy.

Moodle

Moodle® is the learning management system which supports the interactive video class meetings via Collaborate Ultra®. Nursing students are automatically enrolled in Moodle when they are registered for classes at the University. Students will receive a Moodle account upon registration. Students are expected to log into Moodle **at least 2-3 times/ week** or more to obtain course information, materials, and assignments. Students will be required to submit assignments in a timely manner according to the instructor's syllabus and instructions.

Class Attendance

The nursing program is offered in an interactive, synchronized video distance learning format using Collaborate Ultra®. Students are required to follow the [University of Providence Attendance Policy](#), as well as the BSN course attendance policies described in this student handbook and in course syllabi.

In order to meet course student learning outcomes, students are expected to be present and engaged in all scheduled video conferencing class times. Engagement may be exhibited by verbally participating or by messaging with pertinent, substantive comments during the face-to-face time.

- Video cameras should be on at all times
- Microphones should be muted except when speaking

Attendance is required at all clinical, lab, and simulation experiences.

Attendance and participation are taken into consideration when determining the final grade for the course. If circumstances prohibit a student from attending a class session, they must contact the course instructor prior to the

UP BSN *Pre-Licensure* Student Handbook

class. In the event that a technical issues interferes with the delivery of live class time, a backup video of the session may be available.

Students are required to communicate with their professor about both excused and unexcused absences. Students are also required to follow the classroom conduct policies as described in the [University of Providence catalog](#) and the [University of Providence Student Handbook](#)

Professional Behavior Expectations in Class and Clinical

In accordance with the American Association of Colleges of Nursing (AACN) Baccalaureate Essentials (2008) and the American Nurses Association (ANA) Scope and Standards of Practice and Code of Ethics, University of Providence BSN Program students will:

- 1) Accept responsibility for one's own actions and attitudes.
- 2) Demonstrate the ability to develop and maintain therapeutic relationships and appropriate personal boundaries.
- 3) Demonstrate a respectful, sensitive, and non-judgmental manner when communicating with others. In this policy, 'others' refers to peers, faculty, clients, families and facility and school staff.
- 4) Provide prior notification to appropriate faculty when he/she is unable to meet commitments or requirements, detailing how and when he/she will make up requirements.
- 5) Participate in classroom and lab activities as scheduled throughout the nursing program.
- 6) Report for scheduled activities on time and well-rested.
- 7) Complete assignments and tests as required and scheduled.
- 8) Demonstrate professional appearance, conduct, and professional presentation in classroom and lab settings and any activities directly related to the UoP Program of Nursing. This also pertains to conduct while on overnight stays which are directly related to clinical or other UoP organized activities.
- 9) Demonstrate personal and professional ethics, honesty and integrity.
- 10) Demonstrate the ability to use good judgment in decision making.
- 11) Demonstrate accountability in preparation for classroom and lab activities.
- 12) Respect others during classroom and lab activities (i.e., no talking while others are talking, cell phones are silenced, and no inappropriate use of electronic devices).
- 13) Demonstrate respect and care to all individuals regardless of culture, ethnicity, religion, work experience, gender, age and sexual orientation.
- 14) Communicate with others with respect, sensitivity and care in all forms (including verbal, nonverbal, written, and electronic).
- 15) Maintain Standards of confidentiality
- 16) Actively participate as a team member in clinical, lab and class.
- 17) *In regard to nursing lab/clinical courses, the student will:*
 - a. Notify facility and instructor prior to an emergency absence, tardiness or early departure from the course-exception **may** be made in cases of emergency
 - b. Demonstrate preparedness for the courses to ensure that safe and quality client care is provided
 - c. Demonstrate professional appearance and presentation per the dress code described in each clinical course
 - d. Report unethical, harmful or unprofessional behavior(s) of others

UP BSN *Pre-Licensure* Student Handbook

Clinical and Clinical Practice

Clinical Practice encompasses the ability to: learn basic nursing science information; demonstrate competence in the care of clients, families, and communities; provide comprehensive health assessment for clients and communities in all setting, interpret significant assessment findings; and share this information verbally and in writing

Clinical Practice Experiences

Selected nursing courses use a combination of clinical practice experiences which include direct or indirect care, and laboratory simulation activities to ensure students achieve the program outcomes.

Direct care refers to nursing care in direct contact with patients, families, communities and other healthcare providers.

Indirect care activities refer to global actions and/or interventions that impact a population of patients.

Clinical lab and simulations are held in specially designed simulation labs with equipment, task trainers, low-fidelity, and high-fidelity equipment.

In any clinical practice experiences, students are required to wear their University name badge, and they must identify themselves to patients, staff, and administration, as a student. Students should refer to the course/clinical syllabus for further details on dress code requirement *for each clinical course*.

Due to the compression of this program of study, make-up clinical is at the discretion of the faculty and is dependent upon resources, including clinical site and faculty.

Unusual Incidents in the Clinical Setting

Clinical faculty have two primary obligations in the clinical settings: supervision of students and patient safety. Unusual incidents may include student injury or illness; medication administration errors; near misses; and incidents concerning patient safety. A *Near Miss* is an unplanned event that did not result in injury, illness, or damage – but had the potential to do so.

All incidents, events, irregular occurrences, and variances must be identified and reported according to the health care facility's policies and procedures. The purpose of this reporting is to give the health care facility and the health care professionals the opportunity to address the issue and prevent the occurrence of future incidents, events, irregular occurrences, and variances.

Nursing students must immediately report all client care issues, concern or problems to the clinical faculty.

If a student becomes ill or injured, the student shall be directed to treatment as necessary. The faculty will ensure that supervision of the other students is ongoing. The policy and procedures of the agency will be followed regarding reporting of the incident and treatment. Treatment may include: sending the student to the ER of the institution, sending the student to the employee health clinic, calling a cab so that a student can get to a care provider of choice, calling a code, or calling 911.

Effective Communication in Clinical Settings

Effective communication is the ability to exchange information between individuals with the use of verbal, non-verbal, written and electronic communication strategies. Use of effective communication strategies enable students to

UP BSN *Pre-Licensure* Student Handbook

facilitate professional and therapeutic relationships with peers, faculty, staff, clients, families, communities, and other health care professionals. Confirmation of effective communication involves demonstration of understanding through verbal, non-verbal, written and electronic responses by the recipient(s).

The key concepts essential for the development of effective communication include advocacy, client education, collaboration, information literacy, human interface and health literacy.

In addition to being element VI of the Baccalaureate Essentials, effective communication is also key in delivering safe patient care. Patients must be able to understand information and directions provided by the nursing student through verbal, non-verbal and written communication methods.

Demonstration of communication skills that are ineffective, inappropriate, or that recipients (faculty, staff, clients, families, and other health care professionals) consistently cannot understand through either verbal, non-verbal and/or written communication methods will be addressed by faculty who observe and/or receive reports of these concerning skills.

The student will collaborate with faculty to develop an improvement plan that will include specific goals for improvement, access to resources that will assist the student to improve communication skills and consequences if goals are not met by deadlines. If the student cannot demonstrate improvement in communication skills as presented in improvement plan, he/she may either fail a course or be dismissed from the nursing program due to patient safety concerns.

Standards of Confidentiality

Due to the personal nature of nursing and nursing education, students are bound to strict confidentiality expectations under clinical circumstances. Confidentiality is defined as private or secret; information confined to particular persons or groups or providing privacy. Violation of the standards of confidentiality can put the School of Health Professions and the University of Providence at a significant legal risk; therefore, consequences for breaching confidentiality can include dismissal from the nursing program.

- Students are required to sign a confidentiality Agreement Acceptance of Responsibility for Access to Protected Information prior to beginning the nursing program. This is part of the nursing program health, safety, and communicable disease requirements (clinical compliance) tracking at CastleBranch®
 - ***The confidentiality agreement, which students sign on CastleBranch®, encompasses confidentiality in clinical, simulation, post conference, and lab learning***
- All information relating to a client's health and/or personal status per the Health Information Privacy and Accountability Act (HIPAA) is confidential
- All nursing students will complete HIPAA training at application on CastleBranch® which is therefore prior to clinical contact with client or clinical agencies
- Students may be required to participate in orientation to clinical sites, which may include additional HIPAA training specific to that clinical site

Breach of Confidentiality may lead to dismissal from the Program

- Inclusive in the standards of confidentiality regarding HIPAA is the understanding of students not to use electronic or online communication systems to share any information relating to a client's health and/or personal status.

UP BSN *Pre-Licensure* Student Handbook

- All observations made during the performance of other participants in the Nursing Program simulation, learning and testing environments is confidential. All events, procedures, and information are confidential at all times during the simulation, learning, and testing and after it has ended, including patient history information obtained prior to the actual simulation experience, as well as information obtained and used in the pre-briefing sessions. Information about a simulation, content, learning, or testing process will not be shared with others.
- The consequences of violating the confidentiality agreement are dependent on the circumstances and severity of the violation.

Affiliating Agencies

In all agencies where students have learning opportunities, University of Providence has an affiliation agreement which allows students and faculty to participate in appropriate aspects of care to the clients.

Students may not participate in learning experiences in facilities in which there is no affiliation agreement. Students must comply with facility-specific safety and education requirements at all times. The facility requirements will be addressed in each class by the course faculty.

*Please take the time to thank the administrators and staff who assist with clinical learning activities.
And remember, we are guests in these agencies.*

Transportation to Clinical Agencies

Students are responsible for their own transportation to and from clinical agencies throughout the region. Students should expect to travel anywhere within a 200-mile radius of the UP School of Health Professions site. Overnight stays away from home may be necessary for some clinical experiences. Students are responsible for their own lodging. When traveling as a representative of the UP School of Health Professions, students are held to expectations of professionalism as outlined in student code of conduct and this handbook.

Varied Schedules

Students are expected to participate in clinical experiences in a variety of community agencies and at variously scheduled times. Therefore, students must arrange to accommodate an irregular academic schedule that may include evening and weekend hours.

Health Insurance University requirements

All School of Health Professions Nursing Students are required to hold health insurance. Students must upload verification of this at application annually to CastleBranch®

Dress Code

Appearance can impact the level of confidence that our clinical partners and clients have in us. A neat appearance and appropriate attire conveys a professional attitude of excellence that has become synonymous with University of Providence School of Health Professions.

The dress code is required to ensure the safety and control of infection for both students and clients. UoP School of Health Professions nursing students will adhere to an appropriately modest and professional dress code in all clinical settings. Examples of **immodest attire** include, but are not limited to, exposed midriffs, visible cleavage, and visible undergarments.

Clinical faculty will make the final judgment on the appropriateness of student attire and of the corrective action for dress code infractions. Corrective action may include dismissal from the clinical unit and/or clinical failure for the date

UP BSN *Pre-Licensure* Student Handbook

of that clinical.

Dress requirements in clinical settings may vary by Clinical Agency. Always verify dress code mandates with the faculty responsible for each clinical site prior to making any agency and/or client contact

University of Providence School of Health Professions Nursing Student Lab/Clinical Dress Code

- 1) Appropriate identification (name/picture badges) will be worn at all times
- 2) Clinical uniforms are appropriate for most clinical settings
- 3) A white lab coat may be required for clinical preparation – students should check with clinical faculty if needed
- 4) Only clean, closed-toe shoes, either leather or athletic, will be worn
- 5) Denim jeans, sweatshirts/pants, shorts and t-shirts are not acceptable attire in any setting where students are representing the University of Providence
- 6) Hair will be of natural color, clean, neat, and worn off the collar in a contained manner so it will not fall forward into one's face during lab and clinical. If hair is longer than shoulder length it must be pulled back off the face
- 7) Beards and moustaches must be neatly trimmed and/or cleanly shaven
- 8) Fingernails will be short and clean, cut or filed so that the nail does not extend beyond the fingertip
- 9) No nail polish and no artificial nails or tips are allowed
- 10) No jewelry will be worn that could potentially injure a client or the student or compromise safety
- 11) Only two small non-dangling, post earrings are acceptable
- 12) Only one earring in each ear
- 13) No other piercings on the face will be displayed
- 14) No visible body piercings will be displayed
- 15) All visible tattoos must be covered
- 16) Chewing gum is not permitted in Nursing Lab/Clinical settings
- 17) No perfumes, colognes, or after shaves due to allergies
- 18) Because tobacco can trigger asthma and allergic reactions, students shall not use tobacco, including e-cigarettes, while in a clinical/lab assignment
 - Students who smell of tobacco will be asked to leave the clinical assignment; this may result in a clinical failure for the day
- 19) Students must be hygienically clean; without offensive body odors
 - Students with body odor issues will be advised and required to address the concern
- 20) Students with specific religious or cultural concerns which would impact the dress code requirements must address their concerns to their clinical faculty, in writing, prior to client contact.

Current Compliance with Health, Safety, and Immunizations

Students are required to utilize CastleBranch® at application and while in the program for health and safety documentation.

Any changes in status must be updated while in the program including:

- Criminal charges which have occurred since application
- Lapse in any required immunization or health verification
 - Example TB test
 - Hep B series continuation
- CPR certification
- Health Insurance

Failure to maintain currency in health, safety and immunization status may result in dismissal from the program.

APPENDIX A: Course Descriptions

SEMESTER 1: 18 CREDITS (14 DIDACTIC AND 4 CLINICAL CREDITS)

First 8 Week Block:

NRS PL 313 Nursing Practice Fundamentals 3 credits: 1 didactic online, 2 clinical face to face | Course Description:

The Nursing Practice Fundamentals course provides an overview of concepts basic to the nursing profession such as clinical reasoning to include the nursing process, health assessment, vital signs, medical; terminology, basic nursing skills, and beginning medication and dosage calculations. Lab and clinical experiences support the course objectives and student learning outcomes.

NRS PL 410 Evidence Based Nursing Practice 3 credits: online | Course Description:

This course is an introduction to the role of nursing theory, research, and evidence-based practice in the provision of holistic nursing care. An overview of selected nursing theorists will demonstrate the relationship between scientific inquiry and development of nursing knowledge. Students will become familiar with the language of research, gain competency in database query and learn to assess the credibility of scientific studies. Ethical considerations and the importance of scientific integrity are integrated throughout the course as students learn sound methods to answer questions related to nursing practice. The focus is on critical evaluation and application of scientific evidence to provide the highest quality of patient centered care to individuals, families and communities.

NRS PL 370 Introduction to Professional Nursing 2 credits online | Course Description:

This course is designed to emphasize the professional roles and responsibilities of the Registered Nurse. The history of nursing and contemporary practice issues is included in this course. The student will explore the influences of nursing theory, leadership, professional accountability and communication in the delivery of safe client care for a diverse population. Healthcare regulations including licensure, nursing care standards, workplace safety, and health system design will be reviewed.

Second 8 Week:

NRS-PL 372 Nursing Concepts 1 didactic credit online, 2 clinical credits | Course Description:

This course introduces the student to basic adult health management. A framework to support clinical reasoning and clinical judgment in client care will provide the student with the foundation to safely practice professional nursing. The student will learn basic skills needed to begin caring for clients in a variety of clinical settings. Selected nursing practice competencies will be developed and demonstrated in simulated laboratory settings and in direct client care under the supervision of UP faculty. Concepts related to this course include Clinical Reasoning (documentation-EMR/Nurses Notes, laboratory interpretation, medication administration of intravenous fluids), inflammation, fluid balance, acid/base, thermoregulation, oxygenation and perfusion, sensory function, metabolism).

NSR PL 412 Nursing Ethics and Spirituality 3 didactic credits | Course Description:

This course introduces students to leading ethical theories that underlie moral judgment and decision-making in patient care and advocacy. Attention is also paid to the role spirituality can play in helping nurses confront issues of death and human suffering. Students are exposed to the American Nurses Association (2015) Code of Ethics and ethics related to transcultural nursing. Major course themes include an introduction to Utilitarian, Kantian, and Virtue theories with special attention to how these principles apply to nursing practice. An introduction to the elements of Christian spirituality, with an ecumenical emphasis on processing and discerning appropriate responses to challenging and traumatic experiences related to pain, suffering, and end of life care are included.

NRS-PL 376 Pathophysiology and Pharmacology Concepts 3 didactic credits | Course Description:

This course provides an introduction into two related topics: concepts of physiological alteration in body structures / functions, and the principles of safe drug treatment. Building on knowledge of normal human physiology, students develop an understanding of deviations from the norm which threaten homeostasis, including generalized responses and those specific to individual body systems and disease states. Introductory content on the role of genetics / genomics in pathogenesis and treatment of disease is provided. Students will learn pharmacological principles such as pharmacokinetics, pharmacodynamics, drug metabolism, and dose-response relationships to develop a sound basis for

UP BSN *Pre-Licensure* Student Handbook

pharmacologic interventions across the lifespan. The role of the nurse in safe and effective medication administration is emphasized.

SEMESTER 2: 18 CREDITS (15 DIDACTIC AND 3 CLINICAL CREDITS)

First 8 Week Block:

NRS-PL 430 Advanced Nursing Skills 2 clinical credits | Course Description:

This course is designed to promote continued exposure to nursing skills required to provide safe, effective patient care across the life-span. Students will practice focused assessments that include physical, behavioral, psychological, spiritual, socioeconomic, and environmental dimensions. Common diagnostic testing procedures are included with emphasis on expected and unexpected outcomes. Alterations in health related to surgical interventions is included in this course. Skills included in this course are gastrointestinal intubation, delivery of parenteral and enteral nutrition, central venous access management, administration of blood and blood products, burn management, basic ECG interpretation, basic airway management, and infection prevention. Laboratory values and diagnostic testing is included. Therapeutic communication techniques specific to unique populations are addressed in this course.

NRS-PL 422 Quality and Safety in Nursing Leadership 3 didactic credits | Course Description:

This course prepares the nurse to lead and manage care of patients in the context of constant and complex change. Understanding of management and leadership theory supports exploration of personal attributes and essential expertise for nurse manager and leader success. Major themes throughout the course include change and change theory, group-based communication, conflict management, patient safety, and nurse sensitive outcomes of care for patients. This course prepares nurses for effective utilization of healthcare informatics systems for patient care.

NRS-PL 378 Pathophysiology and Pharmacology Concepts II 3 didactic credits | Course Description:

This course continues and builds upon Pathophysiology and Pharmacology Part 1, to further advance students' understanding of disease states and human response to alterations in wellness. Students will continue exploration of drug use for disease prevention, symptom modification and treatment of disease states. Understanding of the nurses' role within the healthcare team will foster skills in safe and effective care, including administration of medications. Best practices for educating individuals and groups about diseases and medications will be explored and ethical, patient-centered care will be emphasized. Students will develop appreciation for the needed lifelong learning in dynamic fields of pathophysiology and pharmacology.

Second 8 Week Block:

NRS-PL 374 Nursing Concepts II 3 didactic credits | Course Description:

This course builds upon fundamental nursing concepts learned in the first semester. This course prepares the nurse for delivering wellness care to childbearing families, children across the healthcare continuum, and addressing patients with mental health needs. It incorporates essential concepts including family dynamics, human development, reproduction, mood and affect, addiction, cognition, fatigue, self-concept, sexuality, stress and coping, and grief and loss.

NRS-PL 414 Population 3 didactic credits | Course Description:

This course prepares the nurse for designing, delivering, and evaluating care for groups, communities, and populations. The course incorporates essential concepts of epidemiology, surveillance, and disaster management from public health. Key aspects of public health care finance are introduced. Central to the course are the themes of social justice, human rights, resource management, and cultural aspects of health and illness.

NRS-PL 421 Nursing Leadership 3 didactic credits, 1 clinical credit | Course Description:

This course builds on the previous course of *Organizational Leadership in Quality and Safety* by examining strategic and administrative aspects of health care delivery in complex organizations. Students are given the opportunity to explore the concepts of leading change, the behavior and culture of organizations and the impact of nursing leadership on the creation of policy which leads to a caring environment in the health care delivery system. The nurse is prepared to enact the leader role in interdisciplinary systems, with emphasis on ethical behavior. Major course themes include the influence or contemporary trends and issues on nursing leadership, the nurse leader's role in improving quality and outcomes, and the leader's approach to economic factors such as budgeting. The nurse applies

UP BSN *Pre-Licensure* Student Handbook

course content at an administrative level in a complex healthcare delivery setting.

SEMESTER 3: 18 CREDITS (7 DIDACTIC AND 11 CLINICAL CREDITS)

First 8 Week Block of Semester 3:

NRS-PL 474 Advanced Nursing Concepts (2 didactic credits) Course Description:

This course builds on Semester 1 and 2 course work. This course focuses on evidence based nursing care of complex patients with chronic health conditions and multiple health needs in urgent, emergent, critical care & palliative care across the adult lifespan. Students will explore and evaluate interdisciplinary interventions, supported by evidence based practice, which are implemented to assist the client toward homeostasis, including hemodynamic monitoring, care of the ventilated client, patient advocacy, and delegation.

NRS-PL 350 Clinical Nursing Practice (4 clinical credits) Course Description:

This clinical course expands on the concepts of care for patients across the lifespan experiencing acute and chronic alterations in health. Clinical experiences will include care of the pediatric patient, childbearing woman, and patient with acute and chronic mental health diagnoses. Mental health issues (including acute psychiatric disorders) across the lifespan are addressed. Development of professional role, ethical decision making, health maintenance and patient education is demonstrated through clinical experiences.

NRS-PL 408 Health Promotion and Disease in the Community (3 didactic credits) Course Description:

This course prepares the nurse to evaluate the impact of health promotion and chronic illness on the patient, family, and community. It emphasizes essential aspects of care of illnesses within the family and community focusing on primary, secondary, and tertiary care. This course emphasizes the health and development issues found across the lifespan. This course focuses on health promotion, education, illness prevention and cultural care of the individual, family and community.

Second 8 Week Block of Semester 3:

NRS-PL 450 Advanced Clinical Nursing Practice (6 clinical credits) Course Description:

Advanced Clinical Nursing Practice is a clinical course, using advanced simulation, and direct care experiences to prepare the student for leadership and practice in complex healthcare settings. The focus of simulation and direct care experiences is care of clients with complex acute healthcare needs in urgent, critical, palliative, and home-care settings across the adult lifespan. Students will engage in simulation weekly, for a total of 44 hours; and will engage in clinical experiences for a total of 226 hours. Directly precepted experiences make up 192 of the 270 clinical hours.

NRS-PL 417 Global Perspectives in Healthcare (2 didactic credits) Course Description:

The development of a global perspective on healthcare is the focus of this course. Students will explore the social determinants of health including local, national, and international trends. Frameworks that emphasize ethical, economic, and social justice concerns are introduced. Students explore global healthcare topics to identify barriers to healthcare access, and integrate the historical, social, political, and economic forces that impact healthcare.

NRS-PL 495 Senior Seminar (1 clinical credit) Course Description:

The purpose of this course is to prepare the graduating student to transition to the profession of nursing with a focus on career development in a competitive, complex, healthcare environment. The student will have the opportunity to engage in quality improvement initiatives to support optimum patient care outcomes demonstrating the use of evidence-based practice. Students will engage in preparing a professional resume and reflect on prior learning to demonstrate a personal and professional commitment to lifelong learning. Students will apply prior course work in preparation for the national licensure examination.

APPENDIX B: Technical Standards for Admission, Academic Progression, and Graduation

Technical Standards

If you have questions or concerns about your ability to meet the technical standards with or without accommodations, or if you would like to arrange reasonable accommodations, you should contact Disability Services.

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others.

To successfully complete the Nursing Program, students must demonstrate their competency in carrying out tasks necessary for safe and effective practice in the field, including:

Observation/Sensory-Motor

- Accurately identify and assess heart, breath, abdominal, and other sounds of the human body
- Accurately assess normal and abnormal color changes in the skin and observe pupil changes
- Accurately differentiate colors and recognize patient odors
- Detect and respond appropriately to activation/warning signals on equipment) including auditory and visual signals)
- Detect significant environmental odors
- Distinguish fine print on various medication labels
- Observe and assess conditions of a patient accurately, at a distance and close at hand, and observe non-verbal communication when performing nursing assessments and interventions or administering medications
- Observe and participate in all demonstrations and experiments in the basic sciences including computer assisted instruction
- Observe digital or waveform readings
- Perceive signs of disease and/or infection as manifested through physical examination including visual images of the body surfaces, palpable changes in various organs and tissues, and auditory information (patient voice, heart sounds, bowel and lung sounds)
- Read gradients/calibrations on a syringe

Communication

- Accurately document treatment information
- Communicate accurately and effectively in English with other students, faculty, staff, patients, families and other professionals in a culturally sensitive manner
- Communicate effectively in classroom presentations, seminars, simulation, practicum sites, practicum conferences, and online-formats
- Convey or exchange accurate information in a clear and efficient manner to obtain a health history, identify problems presented, and explain alternative solutions
- Effectively communicate with and respond appropriately to other healthcare professionals' questions, requests, and directions in classroom, lab and clinical settings
- Process and communicate information on the patient's status including changes in mood, activity and posture and non-verbal communications with accuracy in a timely manner to members of the health care team

UP BSN *Pre-Licensure* Student Handbook

Psychomotor

- Adjust and operate diagnostic or therapeutic devices by manipulating knobs, dials, and keyboards
- Answer patient call lights or intercom system to determine patient needs
- Assemble medical equipment and supplies
- Conduct laboratory and diagnostic tests and carry out physical assessments
- Coordinate fine and gross muscular movements to treat patients in emergency situations
- Engage in patient care delivery in all settings and deliver care to all patient populations including but not limited to children, adolescents, adults, individuals with disabilities, medically compromised patients and vulnerable adults
- Execute physical movements required to provide general care and treatment to all patients in all health care settings
- Move and position heavy and/or large equipment and patients
- Operate equipment typically found in the health care environment including IV pumps, cardiac monitors, and electric and manual blood pressure equipment, safe handling equipment
- Perform basic life support, ventilation/compression (including CPR and AED), and other basic life support functions
- Perform inspection, palpation, auscultation, percussion, and other diagnostic maneuvers
- Provide holistic nursing care and perform or assist with procedures, treatments, and medication administration
- Respond to emergencies precisely, consistently, accurately, and quickly
- Safely assist a patient in moving from one place or another
- Transfer patients from bed to chair, bed to stretcher, chair to bed as needed
- Transport patients in wheelchairs as necessary
- Turn/reposition bedfast patient

Intellectual-Conceptual, Integrative, and Quantitative

- Accurately perform mathematical calculations and calculate medication dosages & IV rates from instructions given
- Analyze, collect, and synthesize data to reach diagnostic and therapeutic judgments and to develop an appropriate plan of care
- Demonstrate factual, conceptual, procedural, and metacognitive knowledge
- Effectively perform chart reviews and continuous assessment of the patient's status
- Effectively prioritize multiple tasks
- Effectively take and record doctors' orders, patient histories, and subjective/objective findings
- Exercise good judgment in patient assessment
- Maintain accurate clinical records on patient care
- Manage the demands of time constraints and frequent interruptions
- Measure, calculate, reason, analyze, integrate, synthesize and problem solve in the context of the level and the focus of their curricular program
- Perform data entry tasks using available technology
- Perform universal precautions against contamination

UP BSN *Pre-Licensure* Student Handbook

- Provide all aspects of patient care including medication administration and treatments according to nursing unit guidelines
- Provide clear expression of personal ideas and feelings, demonstrations of bidirectional feedback, and sensitivity to persons with ideas and experiences that different from their own
- Provide in-depth rationale for plan of care
- Use and interpret information from assessment techniques/maneuvers such as those involved in assessing respiratory and cardiac function, blood pressure, blood sugar, neurological status, etc.
- Use and interpret information related to physiologic phenomena generated from diagnostic tools (sphygmomanometer, otoscope, ophthalmoscope) during a comprehensive examination of a patient

Behavioral and Social Attributes

- Abide by the professional standards of practice defined by the discipline
- Demonstrate compassion, sensitivity, and concern for others
- Demonstrate understanding and adherence to professional standards of nursing
- Function effectively under physically taxing workloads including in times of physical and mental stress
- Function effectively under stress and to adapt to an environment that may change rapidly without warning and/or in unpredictable ways
- Maintain appropriate professional decorum in high stress situations and when exposed to unusual sights and smells
- Maintain confidentiality with regard to all phases of work

I understand that I will be expected to demonstrate competency in the technical standards stated above in order to successfully complete the program.

Student Signature: _____

DATE: _____

APPENDIX C: Immunizations and Health Verifications Check List

It is recommended applicants to the program prepare for the clinical compliance requirements for immunizations by visiting their provider in advance of applying. The following documentation will be required by CastleBranch®. Applicants may scan these items for upload to their account, once they are ready to apply. Because requirements for immunizations vary, applicants should bring this list to their provider to avoid any misunderstanding of what the UP BSN program requires.

A. Tuberculosis Skin Test

- Evidence of an **initial negative two-step TB** skin test upon submitting your application for placement.
- Students with a **positive skin test** are required to provide written clearance from their health care provider to provide patient care and may be required to provide evidence of a chest X-ray or medical treatment before the university will release a registration hold.

B. Measles, Mumps, Rubella (MMR)

- **Measles (Rubella)** -Two doses of measles-containing vaccine (Measles; Measles-Rubella; or Measles Mumps-Rubella) **OR** -a positive IgG antibody titer, regardless of birthdate
- **Mumps**- Two doses of mumps-containing vaccine (regardless of birthdate) **OR** - a positive IgG titer
- **Rubella (GERMAN MEASLES)**: One dose of rubella-containing vaccine **OR** a positive IgG titer

Two doses of MMR or a combination of vaccines as described above: All doses must be after one year of age and at least a month apart; Measles or M/R dates must be 1968 or later; MMR must be 1971 or later; Mumps alone must be 1980 or later; Vaccines must be live virus given without immune globulin.

OR

- Lab reports showing positive IgG antibody titer results for measles, mumps, and rubella
(NOTE: IgM titers are NOT acceptable)

C. Hepatitis B

Three appropriately-spaced vaccine doses and a positive quantitative Hepatitis B surface antibody titer meets the requirement. **The lab report must include reference ranges for quantitative results; the standard for a positive titer is 10 mIU/mL or higher.**

- Three or more documented doses of vaccine and a positive HBSAB-QN/CONC/Index titer

OR

- Hep B series in process: documentation of each dose submitted as received, titer 4-6 weeks after last dose

TIPS: Meeting the Hepatitis B Requirement

- If more than 2 years have elapsed since vaccine was given, we recommend a dose to boost antibodies to a detectable level
- Then, draw the QN HBsAb 4-6 weeks later
- If negative, antigen (HBsAg) testing (for prior exposure or “carrier” status) may be indicated
- If the HBsAg is negative, complete the 2nd series
- Then, recheck the HBsAb titer 4-6 weeks later
- CDC recommendations/rationale for boost and re-titer of health professionals is at:

<http://www.immunize.org/catg.d/p2109.pdf>

- For past/resolved hepatitis B infection:** Submit lab reports for QN HBsAb, HBcAb, and HBsAg.
- For Hepatitis B carriers:** Submit lab report of positive HBsAg; download letter from CB website and submit after provider completes.
- For Hepatitis B non-responders:** Submit documentation of two 3-dose vaccine series; lab report(s) showing negative HBsAg and appropriately timed negative HBsAb;

D. Varicella

Students are required to provide documentation of adequate immunity through a positive varicella titer upon submission of their placement application. ***History of disease is not accepted. Only vaccine or titer.***

- Two doses of varicella vaccine, no earlier than 1995. Dates prior to 3/95 will be rejected

OR

- Positive varicella IgG antibody titer lab report

E. Tetanus-Diphtheria-Pertussis

One dose of Tdap. If given more than 10 years ago, a current dose of Td-containing vaccine. Titers are not accepted in lieu of Td/Tdap vaccine.

- Documentation of Tdap vaccine since 2005 (when vaccine became available) **AND**
- Td OR Tdap in past 10 years, **not expiring during school year.**
(May be same as above.)

F. Influenza Vaccine

Seasonal influenza vaccine documentation is submitted between August and October each year. The vaccine is required.

Waivers: Waivers are permitted *only for medical contraindication*. The waiver must include the health provider’s name. This waiver should be uploaded to CastleBranch® *Egg allergy is no longer a contraindication; egg-free vaccine is available.*

APPENDIX D: Waiver for Immunization Form

SCHOOL OF HEALTH PROFESSIONS

Immunization Waiver Form

I, the undersigned Student: Click or tap here to enter text. understand that obtaining the vaccine prior to entry into a clinical nursing course is a mandatory requirement of University of Providence School of Health Professions and/or the healthcare institution at which the clinical experience will be held, and such immunization cannot be waived except by petition by me to The School of Health Professions.

I am providing supporting documentation to support my request for a waiver for the above stated vaccine based on the following circumstances (**Student Initials** where indicated by a box):

- By not receiving this vaccine at this time, I understand I may be at risk of contracting a serious disease, illness or condition and that I may be exposed to blood or other potentially infectious materials in my nursing clinicals, increasing my risk of acquiring a serious disease, illness or condition.

- I also understand that even if I am granted a waiver for the immunization, the healthcare facility at which the clinical experience is to be held **may, at its discretion, determine to not allow me access** to patient care settings in their facility.

- I understand that in such event, University of Providence School of Health Professions need not and may not be able to provide substitute clinical learning opportunities at a healthcare facility which will allow my entrance without the immunization. This may have a negative impact on my course outcomes, as well as my progression in the nursing program.

- In return, for University of Providence School of Health Professions allowing me a waiver of the immunization as a condition of participating in the clinical portion of my nursing studies, I hereby waive, release and disclaim any claim or cause of action against University of Providence School of Health Professions, its employees, agents, affiliates and the proposed clinical learning site from all loss, costs, claims and liability arising out of or related to my knowing and voluntary refusal to obtain the immunization.

- It is intended by me to assume the risk of any untoward consequences including without limitation; assuming the risk of contracting a disease, illness or condition, by refusing to obtain the immunization and this refusal to obtain the immunization is being done by me in a knowing and voluntary manner.

APPENDIX E. Assessment Technology Institute (ATI®) Policy

The School of Health Professions at University of Providence incorporates ATI products into the curriculum.

Students should refer to individual course syllabi for details related to how the ATI program review tools will be used in each course.

The ATI review program offers the following to students:

- An assessment-driven comprehensive review program designed to enhance student NCLEX® success.
- Multiple assessment and remediation activities. These include assessment indicators for academic success, critical thinking, and learning styles. Additionally, online tutorials, online practice tests, and proctored tests are provided and span major content areas in nursing. These ATI tools, in combination with the nursing program content, assist students to prepare effectively, helping to increase their confidence and familiarity with nursing content.
- ATI Orientation resources, such as the ATI Plan that can be accessed from “My ATI” tab. ***It is highly recommended students spend time navigating through these orientation materials.***
- Students have paid access to ATI for two years after graduation.

REVIEW MODULES/EBOOKS

ATI provides Review Modules in eBook formats that include written and video materials in key content areas. Students are encouraged to use these modules to supplement course work and reading. Instructors may assign chapter reading either during a given course and/or as part of active learning/remediation following assessments.

TUTORIALS

ATI offers unique Tutorials that are designed to teach nursing students how to think like a nurse, how to take a nursing assessment, and how to make sound clinical decisions. Nurse Logic is an excellent way to learn the basics of how nurses think and make decisions. Learning System offers practice tests in specific nursing content areas that allow students to apply the valuable learning tools from Nurse Logic. Features such as a *Hint Button*, a *Talking Glossary*, and a *Critical Thinking Guide* are embedded throughout the Learning System tests to help students gain an understanding of the content.

ASSESSMENTS

There are practice assessments available for students as well as standardized proctored assessments that may be scheduled during courses. ***These assessments will help the student identify what they know as well as areas requiring remediation called Topics to Review.***

FOCUSED REVIEWS/ACTIVE LEARNING/REMEDICATION

Active Learning/Remediation is a process of reviewing content in an area that was not learned or not fully understood (as determined on an ATI assessment). Remediation tools are intended to help the student review important information to be successful in courses and on the NCLEX®. The student’s individual assessment report will contain a listing of the Topics to Review. It’s highly recommended to remediate using the Focused Review after completion of any practice/proctored tests, which contains links to ATI eBooks, media clips, and active learning templates.

- **Proctored Exams must be passed at the benchmark identified in Table 1 to pass the class in which the assessments are embedded.**
 - The proctored tests are scheduled to allow time for remediation.

- Benchmarks for the level 1, 2, 3, 4, and Pharmacology tests are explained in **Table 2** and reflect best practices described by ATI.
- Students not meeting the benchmark will receive an incomplete in the course in which the assessment is imbedded and must remediate and retest until the benchmark is met on proctored tests.
- The instructor has online access to detailed information about the timing and duration of time spent in assessments, focused reviews, and tutorials by each student.
- Students may be required to provide documentation that the required ATI remediation work was completed using the “My Transcript” feature under “My Results” of the ATI Student Home Page or by submitting written Remediation Templates as required by the faculty to MOODLE.
- Course Syllabi will contain an explanation of points assigned to ATI proctored tests

ATI VIRTUAL REVIEW (VATI)

ATI Virtual Review is an online asynchronous experience which pairs students with an educator; making recommendations for readiness to take the NCLEX-RN® (called the green light).

Prior to the ATI Live Review, students are required to:

- Complete Nurse Logic Testing Strategies
- Complete Fundamentals Assessment of Individualized Remediation

VATI begins 3 weeks prior to graduation **and is required as part of NRS 495**. Students have access to VATI for 12 weeks. It is recommended students continue to engage in the Virtual ATI review after graduation. The 12 – week clock continues to run from when the student began Virtual ATI (VATI), 3 weeks prior to graduation. Engagement with the VATI is an important habit to prepare the student for the NCLEX-RN®.

Graduates are encouraged to attain the “green light” prior to attempting their NCLEX-RN® test.

ATI LIVE REVIEW

An ATI **Live Review** will be held on campus at the last week of the program. Attendance is required as part of the Letter Grade in NRS 495. The instructor led session includes review of content for the entry-level nurse as guided by the current NCLEX Test Plan. Each day of the review participants will use resources including The Comprehensive NCLEX RN Review book, videos, and active learning activities.

School of Health Professions ATI Testing Plan | Benchmarking | Policy 2019

TABLE 1					
ATI Practice Exam*	Level and Score minimum to earn points	Week / course	Timed ATI Proctored Exam	Required Benchmark (corresponds to a grade in course)	Date/Course
RN Level 1 A & B	Level 1 (100 items) (55%) [percentile rank of 19]	NRS 403 week 6 and 7	RN Level 1 (130 items) 130 minutes	Level 1 (55%) [percentile rank of 15]	NRS 419 Week 6 thru 7
RN Level 2 A & B	Level 2 (110 items) (60%) [percentile rank of 54]	NRS 421 Week 1 and 2	Level 2 assessment (140 items) 140 minutes	Level 2 (60%) [**percentile rank of 54]	NRS 421 Weeks 6-7
RN Level 3 & B	A Level 2 (110 items) (62.7%) [percentile rank of 54]	NRS 474 Weeks 3 & 4	Level 3 assessment (140 items) 140 minutes	Level 2 (62.7%) [percentile rank of 54]	NRS 474 Weeks 6-7
RN Level 4 & B	A Level 2 (110 items) (64.5%) [percentile rank of 45]	NRS 474 Weeks 7-8	Level 4 assessment (140 items) 140 minutes	Level 2 (64.5%) [percentile rank of 45]	NRS 495 Week 1-2
Pharmacology A & B	Level 2 (60 items) (71.7-83.3%) [percentile rank of 72]	NRS 495 Week 2	Pharmacology (70 items) 70 minutes	Level 2 (71.7-83.3%) [percentile rank of 72]	NRS 495 Week 3
RN comprehensive Predictor Practice A & B	70% (150 items) (see probability ranking) Same as Level 2 (see pg. 3 & 4 of Integration Best Practices Successful Incorporation of ATI Resources)	NRS 495 Week 3	RN Comprehensive Predictor (180 items) 180 minutes	70% (91% probability of passing NCLEX) [percentile rank of 45]	NRS 495 Week 4
ATI Virtual Review	See Virtual ATI (VATI) student orientation guide	Must start by 3 weeks prior to graduation	Complete Nurse Logic Testing Strategies and Fundamentals Assessment of Individualized Remediation by the week of graduation and before the live review begins	20 points if completed 0 (zero points if not completed)	NRS 495 Week 5
NCLEX Review Course	Live Review will be held on campus at the last week of the program.	Attendance is required as part of the Letter Grade	Review and apply test- taking strategies on NCLEX-style questions	This is a pass/fail requirement. Failure to attend the live review will	NRS 495 Week 8 Live Review

		in NRS 495	Participate in an interactive review session with an expert nurse educator Plan for continued study and review using individualized study plan Build confidence for NCLEX success	result in course failure.	
--	--	------------	---	---------------------------	--

****Percentile rank: doing as well than or better than ___ % of the other persons taking this test.**

TABLE 2							
RN Concept Based Proctored Assessment	Level 1 Cut Score	Level 2 Cut Score	Level 3 Cut Score	Students Below Level 1	Students Meeting Level 1	Students Meeting Level 2	Students Meeting Level 3
Level 1 assessment	55%	68%	76%	14%	50%	29%	7%
Level 2 assessment	51.8%	60%	69.1%	15%	35%	37%	12%
Level 3 assessment	52.7%	62.7%	74.5%	12%	39%	40%	9%
Level 4 assessment	53.6%	64.5%	76.4%	7%	34%	49%	10%
Pharmacology	56.7%	71.7%	85%	10%	48%	37%	5%

Brief Descriptions of Each Proctored Test

RN LEVEL 1: The Level 1 CBC exam is comprised of **130 items** developed to assess RN nursing students' comprehension and understanding of the following concepts. These are appropriate for assessing RN nursing students approximately one-quarter of the way through their concept-based curriculum.

Allow **130 minutes** (2 hours and 10 minutes) to complete the assessment.

Safety; Health Promotion/Disease prevention/Wellness; Healthcare law; Nutrition; Pain; Communication; Elimination; Infection; Comfort; Diversity; Informatics; Spirituality; Tissue Integrity; Patient Centered Care

RN LEVEL 2: The Level 2 CBC exam is comprised of **140 items** developed to assess RN nursing students' comprehension and understanding of the following concepts. These are appropriate for assessing RN nursing students approximately **half way through** their concept-based curriculum.

Allow **140 minutes** (2 hours and 20 minutes) to complete the assessment.

Elimination; Infection; Gas Exchange/Oxygenation; Perfusion; Inflammation; Mobility; Acid base; F/E balance; Metabolism; Sensory Perception; Stress and Coping; Nutrition; Critical Thinking; Grief; Teaching and Learning in pt education; thermoregulation

RN Level 3: The Level 3 CBC exam is comprised of **140 items** developed to assess RN nursing students' comprehension and understanding of the following concepts. These are appropriate for assessing RN nursing students **approximately three-quarters** of the way through their concept-based curriculum.

Allow **140 minutes** (2 hours and 20 minutes) to complete the assessment.

Reproduction; stress and coping; perfusion; inflammation; cellular regulation; human growth and development; mood and affect; cognition; intracranial regulation; health promotion and disease prevention; end of life issues; immunity; interpersonal violence; sexuality

RN Level 4: The Level 4 CBC exam is comprised of **140 items** developed to assess RN nursing students' comprehension and understanding of the following concepts. These are appropriate for assessing RN nursing students at the end of their concept-based curriculum.

Allow **140 minutes** (2 hours and 20 minutes) to complete the assessment.

Perfusion; Intracranial regulation; Leadership and Management; F/E balance; Healthcare Law; Immunity; Infection; Gas Exchange; Mobility; Metabolism; Critical Thinking; Tissue Integrity; Clotting; Collaborative frameworks; Ethics; EBP; Health Policy; HealthCare Delivery models; QI; Professional Identity

Pharmacology: This **70-item** test offers an assessment of basic comprehension and mastery of pharmacology nursing principles including:

Basic pharmacological principles (pharmacodynamics, pharmacokinetics, safe medication administration, medication error prevention, age-specific considerations, and dosage calculations);

Knowledge that relates to the safe administration and monitoring of prototype medications that affect the nervous, respiratory, cardiovascular, hematological, gastrointestinal, reproductive, and endocrine systems;

Medications for pain and inflammation (non-opioid analgesics, opioid agonists and antagonists, and adjuvant pain medications);

Medications that affect immunity (immunizations, chemotherapy agents);

Medications for infection;

Allow **70 minutes** to complete the examination.

Comprehensive Predictor: This **180-item** test offers an assessment of the student's comprehension and mastery of basic principles including fundamentals of nursing, pharmacology, adult medical-surgical nursing, maternal newborn care, mental health nursing, nursing care of children, nutrition, leadership, and community health nursing. The percentage of questions from all major NCLEX® client need categories (management of care, safety and infection control, health promotion and maintenance, psychosocial integrity, basic care and comfort, pharmacological and parenteral therapies, reduction of risk potential, and physiological adaptation) will be similar to the percentage of questions on the NCLEXRN®.

This test will generate the following data: Individual Score (% Correct), Predicted Probability to Pass NCLEX-RN®, National and Program Means, Individual Scores (%Correct) within Content Topic Categories, Topics to Review, and Individual Scores (% Correct) within an Outcome (Thinking Skills, Nursing Process, Priority Setting, NCLEX-RN® Client Need Categories, Clinical Areas, QSEN, NLN Competency, and BSN Essentials). The student has 180 min (3 hr) to complete this assessment. Correct) within Content Topic Categories, Topics to Review, and Individual Scores (% Correct) within an Outcome (Thinking Skills, Nursing Process, Priority Setting, NCLEX-RN® Client Need Categories, Clinical Areas, QSEN, NLN Competency, and BSN Essentials).

Allow **180 min** (3 hr) to complete this assessment.

VATI ORIENTATION CHECKLIST

Students will engage in Virtual ATI (VATI) 3 weeks prior to graduation and while enrolled in NRS 495. See NRS 495 requirements for assignment completion.

COMPLETED	
	<p>Watch the Video Orientation to VATI:</p> <ul style="list-style-type: none"> ● Full Overview ● Getting Started ● Navigating the Review ● Determining NCLEX Readiness
	<p>Confirm you have a valid email address listed in your atitesting.com account and the correct institution listed to facilitate all communication.</p>
	<p>When the enrollment process begins, students will receive a welcome email from Virtual-ATI with a link to a survey that must be completed before being enrolled in the program.</p>
	<p>Within 24 hours (Monday through Friday) of completing the survey, students will receive an email from Virtual-ATI confirming their enrollment and notifying them that their 12 weeks of access has begun. The email will include instructions for logging on to the Virtual-ATI NCLEX Review.</p>
	<p>When communicating with their coach via messaging in the Virtual-ATI NCLEX review, graduates should expect a response within 24 hours, except on Sundays and major holidays. www.atitesting.com ©2017 Assessment Technologies Institute®, Inc.</p>
	<p>Graduates will have access to Virtual-ATI until they pass NCLEX up to a maximum of 12 weeks and must actively participate (communicating with their Virtual-ATI coach, taking assessments, and completing all remediation regularly up until their NCLEX date) to be successful.</p>
	<p>Virtual-ATI is most effective when graduates commit to reviewing a minimum of 2 hours per day, 5 days per week.</p>
	<p>Once graduates receive the Green Light from their coach, it's recommended they take the NCLEX within 3 weeks for optimal results.</p> <p>After 3 weeks has elapsed, the Green Light status will expire.</p>
