

COVID-19 Close Contact/Exposure Flow Chart

I'VE BEEN IN CLOSE CONTACT WITH SOMEONE WHO....

Definition of Close Contact

- Being within 6 feet
- For a period of 15 minutes or more

*A person who had severe/critical illness or is severely immunocompromised should:
 if symptomatic, stay home away from others or under isolation precautions until:
 At least 20 days have passed since symptoms first appeared; AND
 At least 24 hours have passed since last fever without the use of medicine that reduces fevers; AND
 Other symptoms have improved.
 If asymptomatic, stay home away from others or under isolation precautions until:
 At least 20 days have passed since positive COVID-19 test result while asymptomatic. If symptoms develop, follow guidance for symptomatic and tested positive for COVID-19.
 Outside of these criteria above, extension of isolation is not routinely recommended if an individual is retested within 3 months of onset of symptoms or date of first positive test while asymptomatic.

**CDC advice on when to seek emergency medical attention:
 Call 911 or go directly to the Emergency Room**

- shortness of breath
- trouble breathing
- new confusion
- inability to wake or stay awake
- bluish lips or face
